Update on Escondido Burn Operation

The fire is still smoldering. Firefighters will allow the fire to burn out. Air pollution sensors confirm there is no danger to the community. A Reverse 9-1-1 message for those sheltering in place is being prepared to let them know that they can now open their doors and windows. An evacuation notice remains in place. The target time for re-entry is 2:00 p.m. Traffic Control Points remain in place around Via Scott so returning residents must show their I.D.
